

Benin microgrid benefits

Overview

This initiative represents a major step toward reducing energy inequalities, stimulating the rural economy, and advancing Benin's transition to decarbonized energy. The research adopts a techno-economic and socio-environmental analysis using secondary data and. Thursday, July 10, 2025, Cotonou, Benin – The Government of Benin, in partnership with the United Nations Development Programme (UNDP) and with financial support from the Global Environment Facility (GEF), officially launched Benin's national implementation of the Africa Minigrids Program (AMP). We develop, finance, build and operate large-scale ground mounted solar farms, industrial solar rooftops and off-grid solar systems. Currently, the electricity supply is limited to solar bulbs, few. This project aims to foster economic development in rural Benin by promoting the productive uses of electricity (PUE) through solar mini-grids in Benin. The Dohouè MySol Grid in Benin.
