

Burundi new energy solar site

Overview

Built through a multinational effort, the pioneering 7.5 MW solar PV plant near the village of Mubuga has been in operation since May 2021 and now provides over 10% of Burundi's electricity, supplying clean power to tens of thousands of homes and businesses. "Rocketing fuel prices and regular outages from the national grid mean hospitals are often forced. The project is a 7.5 MW solar PV plant in Mubuga, Burundi. Partners include the UK's Renewable Energy Performance Platform (REPP), Inspired Evolution, Africa Trade Insurance Agency (ATI). The Solar Energy Project in Local Communities – known as Soleil-Nyakiriza – is an initiative of the Government of Burundi, launched in 2020 and supported by the World Bank Group. This project aims to improve the daily lives of hundreds of thousands of people who do not have access to reliable. With an electricity access rate of only 25.9 percent relying on decentralized solutions. In response, Bujumbura has unveiled its.
