

China-Africa energy storage power generation project planning

Overview

On June 21, local time, during the 2025 African Energy Forum, China Nengjian signed an EPC contract with Globeleq, a British independent power producer, for the largest single battery energy storage power station in Africa, the 153MW/612 MWh battery energy storage. On June 21, local time, during the 2025 African Energy Forum, China Nengjian signed an EPC contract with Globeleq, a British independent power producer, for the largest single battery energy storage power station in Africa, the 153MW/612 MWh battery energy storage. China has emerged as a pivotal partner in addressing Africa's critical energy infrastructure gap, with over 600 million people on the continent—primarily in sub-Saharan Africa—lacking electricity access. This report examines Chinese-backed energy projects in Africa from 2020 to 2024, highlighting. Over the past few decades, China has become the largest investor in Africa's new energy market, with large-scale hydropower, solar, and wind projects worth billions of dollars attempting to turn the continent's. The 100MW Redstone concentrated solar thermal power plant is located in the Northern Cape province of South Africa. It will provide approximately 300 million kilowatt-hours of clean electricity to the South. China-Africa energy cooperation is evolving from construction-focused initiatives to a more integrated phase encompassing build, invest, and operate models. Against this backdrop, Kourtong's 32MW solar-storage-diesel multi-energy complementary smart microgrid project in the Democratic Republic. China is playing an ever important role in Africa's energy transition, mainly via its massive investment and loans on various energy infrastructure projects ranging from extractive activities in oil and gas industries, power generation facilities including both traditional and renewable energy.
