

China and the United States reach agreement on photovoltaic energy storage

Overview

According to the phased agreement reached in May 2025, the United States suspends the 24% "reciprocal tariff" on China and cancels the 125% superimposed tariff, retains the 10% base tariff, and provides a 90-day buffer period for Chinese photovoltaic products. The impact of the latest tariff policies of China and the United States on the photovoltaic industry presents a multi-dimensional and deep-level structural adjustment, which not only brings short-term pain, but also promotes the industry to accelerate the transformation to technological upgrading. The United States and China have renewed their long-standing science and technology agreement, marking a cautious continuation of collaboration amid heightened tensions. The revised US-China Science and Technology Cooperation Agreement, announced on Friday, is set to last five years and aims to. The United States and China agreed to "sufficiently accelerate" the deployment of clean energy and boost global production of renewables in a bid to begin displacing fossil fuels and address the climate crisis. Their joint announcement on Tuesday* included a commitment by the world's two largest. The new energy industry is about to face tough challenges from both the "Big and Beautiful" Act and "reciprocal tariffs. As China advances towards its carbon peaking and.
