Financing scheme for fast charging of outdoor telecom enclosures in central asia

Overview

WASHINGTON, January 22, 2026— The World Bank's Board of Executive Directors today approved the Regional Electricity Market Interconnectivity and Trade (REMIT) Program, which will be implemented over a 10-year period across three phases to boost energy connectivity in Central Asia. The establishment of a dedicated fund under the Multilateral Cooperation Center for Development Finance (MCDF) Finance Facility for supporting connectivity infrastructure development in Central Asia was approved during a special meeting of the MCDF Governing Committee that was held virtually on 22. In 2025 the European Bank for Reconstruction and Development (EBRD) invested almost US$2 billion (€1. 72 billion) through 120 projects in Central Asia and Mongolia. This represents one of the Bank's strongest operational results in the region for more than a decade. Greater infrastructure development could give Central Asian economies a critical boost by enhancing growth, poverty eradication. Held in a hybrid format on the margins of the Astana International Forum (AIF), the consultations gathered more than 50 policymakers and energy experts from Kazakhstan, Kyrgyz Republic, Tajikistan, Turkmenistan and Uzbekistan to discuss achievements made to date within the programme and to examine.
