

Gabon tesla solar roof

Overview

Gabon's Ogooué River Solar Project isn't just slapping panels on roofs. They're pairing 80MW of solar with lithium-ion batteries that could store enough juice to charge 3 million smartphones daily. Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Tesla's power producing photovoltaic (PV) roofing Tiles are visually indistinguishable from the non-power producing metal or glass roofing Tiles, enabling homeowners the ability to harvest solar energy without aesthetic. In October 2016, Elon Musk stepped onto a stage in Los Angeles and unveiled what he called the last roof anyone would ever need — solar tiles so convincing they were indistinguishable from slate, capable of generating power for decades. Now imagine this biodiversity champion leapfrogging traditional power grids like a tech-savvy kangaroo. That's Gabon's energy revolution in a nutshell.
