

How much does a 20kW custom outdoor cabinets cost in an Australian mine

Overview

According to data from Solar Choice's installer network database, a fully installed 20kW system will cost roughly \$15,000 – \$22,000 as of August 2024. These figures include the up-front 'discount'/incentive available under the federal government's Renewable Energy Target for systems under 100kW in. Our 20kW systems vary in price depending on which Package you choose to go for. The packages range from our. A 20kW solar system in Australia costs \$17,500 – \$22,600, produces around 78 – 90 kWh per day, and typically suits large homes or commercial sites aiming to save \$6,200 – \$7,800 per year, depending on usage and feed-in tariffs. This depends on a few factors, including: While the base unit itself can cost \$16,000 to \$27,000, that doesn't include installation and wiring (\$1,500 to \$3,000) or backup integration (\$800 to \$1,500). With a return on investment currently possible in less than 5 years, a 20kW solar kit is an attractive investment option for your business, reducing short to medium-term operating.
