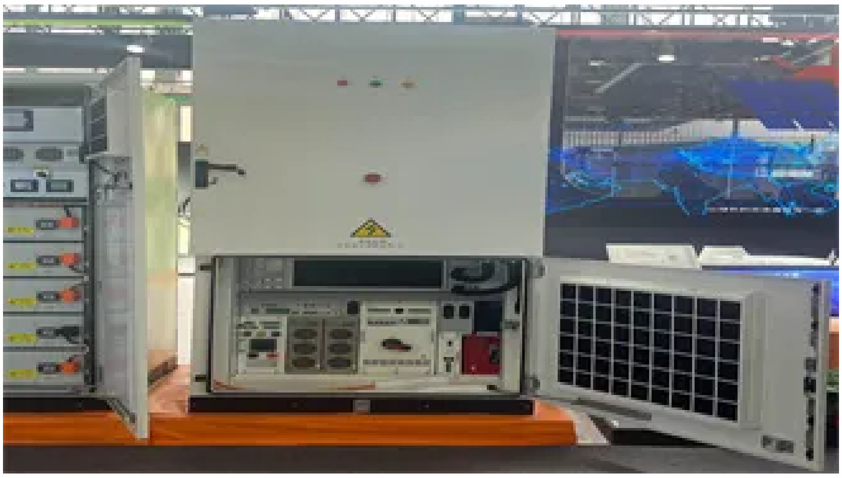
How much tax should be paid on income from photovoltaic power generation



Overview

The legislator reformed the basic taxation regime with the JStG 2022, introducing a tax exemption in income tax and a zero tax rate in value-added tax for photovoltaic systems. 72 in conjunction with § 52 Para. The tax exemption applies regardless of the date the photovoltaic system was commissioned for income and withdrawals generated since 1 January 2022. The simplification rule from 2022 is structured differently from the previous. The owner of a qualified solar facility may claim the investment tax credit (“ITC”). The new taxation regime could be relevant for the oral tax advisor examination in 2024 and the written examination in. Since January 1, 2022, PV systems up to 30 kWp on single-family homes, garages, and commercial buildings are exempt from income tax. From 2025, this threshold also applies per residential unit in multi-family and mixed-use buildings. The exemption covers feed-in payments, tenant electricity, EV.
