

Kazakhstan Energy Storage Power Station New Energy Project Plan

Overview

Kazakhstan plans to build large energy storage systems that will store electricity from solar and wind power plants and release it into the grid during peak demand, Orda. The issue was discussed at a meeting at the Ministry of Energy. Kazakhstan's renewable energy capacity could reach 19 gigawatts (GW) by 2030, representing at least 30% of the nation's total generating capacity, according to Nabi Aitzhanov, CEO of the Kazakhstan Electricity Grid Operating Company (KEGOC). 7 GW of new generating capacity by 2029 as part of 68 energy projects aimed at modernizing infrastructure, strengthening energy security, and expanding generation potential. At the same time, 16. Minister of Energy of the Republic of Kazakhstan Yerlan Akkenzhenov reported at the Government session on the ongoing work to modernize the energy infrastructure. He noted that, in general, the country's energy system operates normally, in parallel with the energy systems of the Russian Federation. 1 Kazakhstan is at a critical juncture where decisive policy action could unlock its significant clean energy potential.
