

Lithuania wind solar and energy storage project construction

Overview

The Jonava project is a hybrid renewable energy development with a planned capacity of approximately 470 MW, combining around 140 MW of onshore wind, 330 MWp of solar PV, and 320 MWh of energy storage. Construction is expected to commence shortly, with full commercial operation. – 470 MW hybrid project combining wind, solar, and storage divested to Energix, with construction set to begin and operation expected by 2027. – Integrated development approach advances projects from early stage to ready to build projects aligned with investor requirements. This article explores the latest developments, key projects, and future prospects for energy storage power stations in Lithuania, with actionable insights for industry. 65 MWh battery system completes construction in Lithuania, as European Energy gears up for new phase of renewable energy roll-out in the Baltics. The transaction is set for completion in 2025. The project, which is in the. European Energy has completed the divestment of the Jonava renewable energy project in Lithuania to Energix – Renewable Energies, marking another transaction that highlights the company's ability to develop high-quality, large-scale renewable energy assets across its markets.

Article Content

European Energy Sells 470 MW Jonava Hybrid Project

European Energy has sold its 470 MW Jonava hybrid renewable project in Lithuania to Energix – Renewable Energies. The project combines 140 MW of onshore wind, 330 MWp of solar

European Energy divests 470 MW hybrid renewable project in

The project has a planned capacity of about 470 MW, combining 140 MW of onshore wind, 330 MWp of solar PV, and 320 MWh of energy storage. The project is scheduled to begin

European Energy signs PPA for 161 MW wind farm in Lithuania

The project has a planned capacity of about 470 MW, combining 140 MW of onshore wind, 330 MWp of solar PV, and 320 MWh of energy storage. The project is scheduled to begin

European Energy Divests Jonava Project in Lithuania, Demonstrating ...

The Jonava project is a hybrid renewable energy development with a planned capacity of approximately 470 MW, combining around 140 MW of onshore wind, 330 MWp of solar PV, and 320

Lithuania Powers Ahead: Renewables, Storage, and Grid Upgrades ...

In October 2025, Lithuania continued to make significant strides in its energy transition, focusing on expanding renewable generation, energy storage, and grid resilience.
