

New Energy Storage Industry Conference

Overview

2026 2nd International Conference on New Energy Engineering, Energy Storage and Micro-Grid Technology (NESMT 2026) will be held in Tianjin, China on June 5-7, 2026. As New York City leaders strive to create a more affordable, liveable City, rising energy prices and grid reliability are center stage. The combination of extreme weather driven by climate change and electric load growth driven by electrification presents a near-term challenge for customers. As Germany accelerates toward 24GW of utility-scale storage by 2037, asset owners and developers face a new reality: grid congestion, revenue cannibalisation and evolving market mechanisms. Please adjust your arrangements accordingly. This conference aims to bring together leading scholars, researchers, and industry. Energy Storage Summit at The Battery Show Europe delivers focused insight into the operational, commercial and technical challenges shaping energy storage deployment in Europe. Co-located with The Battery Show Europe, the conference brings together asset owners, developers, investors, optimisers.
