

# Photovoltaic panel roof price trend forecast

## Overview

Explore the latest PV panel price trends for 2026, including cost shifts, emerging tech like perovskite tandems, and market dynamics. The global rooftop solar photovoltaic (PV) market is experiencing substantial growth, propelled by escalating climate change concerns, rising electricity costs, and favorable government initiatives promoting renewable energy. The market, currently valued at \$13.5 billion in 2025 and is projected to reach \$981. Another report indicates a CAGR of 15. Over the years, Discover how solar panel costs have evolved since 2020 and what drives pricing fluctuations in today's renewable energy. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems.
