

RV power station solar power generation system

Overview

Would you like to boondock and be able to watch TV and use your toaster or microwave, without having to run a noisy gas generator outside?

This is possible because you can plug a solar generator/power station directly into your RV camper. You can plug a camper into a solar generator, and I know this since I do it myself as I'll talk more about down below. I do it with an 15A to 30A. My wife and I travel fulltime in a travel trailer, and our setup is a Goal Zero Yeti 1000 and 400 watts of solar panels. We boondock 95% of the time, our Yeti and solar panels cover 90% of. You could put your power station outside or in one of the storage compartments and pull the 30A/50A cable to it, but what I have done lets me keep the power station in the trailer, so I can. The Yeti runs everything in my camper, except for the AC compressor. I haven't tried because I don't want to trip the Yeti, but I know that a 13,500 BTU air conditioner requires more power than the Yeti can output. It also couldn't run my 900W microwave, but I.
