

Renewable energy growth lisbon

Overview

In 2025, Portugal's renewable energy sector experienced robust growth, driven by solar expansion and supportive policies. Electricity consumption hit an all-time high of 53. Wind is the movement of air masses, caused by differential heating of zones in the atmosphere or by the orography of the terrain. Hydropower production takes place in hydroelectric power plants that may have. This publication includes mainland Portugal and the Autonomous Regions of Azores and Madeira and monitors, on a monthly basis, the development of the installed capacity and production of energy from renewable sources. 7 % of the EU's net greenhouse gas (GHG) emissions, and achieved net emissions reductions of 43. 2 % in emissions covered. We are excited to announce the 3 rd European Meeting on Renewable Energy and Sustainable Technology, taking place from October 05-06, 2026 at the Ramada by Wyndham Lisbon, Portugal. We are pleased to welcome all participants from across the globe.
