

Solar panel n-type double glass module

Overview

Two-sided double-glazed modules, symmetrical structural design, low risk of hidden cracks. Higher power output even under low irradiance environments like on cloudy or foggy days 3-fold IEC new standard tests passed, 15-year material warranty, and 30-year power warranty. DMEGC Solar offers top-tier solar modules with a Class A fire rating for maximum safety. Our fully traceable supply chain ensures transparency and quality, while our low debt-to-asset ratio demonstrates financial stability. With extensive accreditations including ISO, IEC, and TÜV certifications. DAS Solar is always a faithful companion where there is light. Bifacial ratio reaches 80%, 30% more module power generation than conventional modules. Bifacial solar cells can. Glass-glass PV modules, also known as double glass solar panels, are photovoltaic modules encapsulated with tempered glass on both the front and back sides. This supports consistently stable energy yield across the full 30-year.
