

Tallinn electric vehicle incentives

Overview

In 2026, the Estonian government enhanced its subsidy scheme, allowing coverage of up to 50% of the purchase price of an electric vehicle, with a particular focus on compact and utility models. This program was terminated for private individuals at the end of 2023 and for business customers in September 2023. There are no announced plans to reinstate direct purchase subsidies for BEVs in 2025 or. To support the growth of electric mobility, Tallinn benefits from a set of incentives, including government grants and subsidies. These financial aids play a decisive role in making the purchase of an electric vehicle more accessible, especially given the often higher initial costs compared to. Starting Monday, February 27, interested parties can once again apply for support for the purchase of an electric vehicle (EV), as the state is distributing a total of €8. 5 million in grants toward the purchase of 1,700 EVs. Economic expert Kaspar Oja says that with this scheme, the state is. The grant will be provided for the purchase of new all-electric (including hydrogen fuel cell) passenger cars and light vans (categories M1 and N1), as well as electric cargo bikes (NB! Budget exhausted), which can be acquired both under a sales contract or put into service under a leasing. The largest charging operators, Estonia's Enefit and Eleport, as well as Elektrum and Ignitis ON, owned by the Latvian and Lithuanian state electricity companies, are constantly building new fast 50–100 kW and ultra-fast 150–400 kW charging stations across Estonia. Deputy Mayor Kristjan Järvan (Isamaa) said electric cars could lose the right to use bus lanes. The number of zero-carbon-emission vehicles.
