

Tax rate for wind energy storage project development

Overview

Today it's a 6% base or 30% if you meet prevailing-wage & apprenticeship (PWA) rules (or qualify for the small-project exception), with potential +10 pts bonuses for domestic content and energy-community siting. Standalone storage also qualifies. The Inflation Reduction Act (IRA), which became law on August 16, 2022, extends and increases tax credits for wind energy projects that begin construction prior to January 1, 2025. Two tax credits, the investment tax credit (ITC) and the production tax credit (PTC), directly support investment in wind and solar electric power. For investment in renewable energy projects including fuel cell, solar, geothermal, small wind, energy storage, biogas, microgrid controllers, and combined heat and power properties. Technology-neutral tax credit for investment in facilities that generate clean electricity and qualified energy. The ITC is a one-time federal tax credit equal to a percentage of a project's "qualified investment" when it's placed in service.
