

The largest three-phase solar inverter

Overview

Solis' largest three-phase, 1500 V DC PV string inverter, the 250K, features 12 independent MPPTs, enabling great redundancy in larger systems. Redundancy through a distributed method supports overall system uptime. With our high current rated DC inputs, systems can realize full capacity as well of. The hybrid inverter is a multifunctional device that combines several technologies to efficiently manage energy flows between different sources and destinations. Its operation is based on a sophisticated architecture that allows it to perform several essential roles simultaneously. They enable even power distribution, higher output capacities and ensure maximum efficiency. Delivering up to 98%. The SolaX X3-GRAND HV is a 350kW ground-mounted string inverter delivering 99. Its 1500V DC input and PLC communication ensure wide.
