

What bolts are used for the photovoltaic bracket back support

Overview

ART9097 T-bolts (stainless steel) are widely used fasteners in solar mounting systems. They are specialized bolts featuring a T-shaped head and a fully threaded shaft, specifically designed for photovoltaic (PV) equipment construction. Ensure maximum reliability in your photovoltaic panel installation: choose our specialised screws and bolts, made of stainless and galvanised steel, tested with thousands of solar power systems in Italy and Europe, according to the highest industry standards. They slide into framing slots and lock in place, making them ideal PV bolts for securing solar panels. In recent years, innovative tool-free and screwless fastening systems have made installation faster and simpler, helping us save.
