

What is the charging power of Morocco's outdoor power supply

Overview

Morocco operates at 220 volts / 50 Hz — the European standard. This differs significantly from North America (120V / 60Hz) and Japan (100V / 60Hz). A plug adapter changes the plug shape only — it does not convert voltage. What type of plugs and sockets are used in Morocco?

When you are going on a trip to Morocco, be sure to pack the appropriate travel plug adapter that fits the local sockets. Since type F plugs are. Morocco uses 220V/50Hz with Type C (two round pins) and Type E (round pins with earth hole in socket) outlets - similar to France's electrical standard, reflecting Moroccan-French infrastructure ties. Marrakech, Casablanca, and Fès's medina riads and tourist hotels are well-equipped. Type C outlets are one of the most widely-used electrical outlets in Europe, while Type E is common in France as well as Morocco and is compatible with Type C. Use this tool to check whether your home country's plug type is compatible with Morocco's sockets — and which adapter you need if it isn't. Also read: Marrakech Travel Guide for the First Time Visitors - Type C: They are the two-round pin plug commonly called the “Europlug.”
